

What do we do at Liverty Housing?

Liverty Housing's mission is to enhance the lives of individuals with disability by offering avenues for self-reliant living. This led us to create a model that is a progressive, inclusive, and contemporary housing solution. Liverty is a registered provider of Specialist Disability Accommodation (SDA). Liverty's current model is to acquire 11 apartments off the plan 'peppered' throughout larger developments.

What is the model? **10+1 Explained**

Within larger apartment complexes, Liverty has created a community for 10 SDA apartments. An additional apartment is utilised by the on-site shared support provider.

This allows participants to lead fully independent and private lives, with support only a call away.

What are **On-Site Supports (OSS)**

On-site, on-call shared supports are accessible and shared among all 10 residents. A Carer stays onsite 24/7 and can be accessed by phone call, or nurse call systems. These on call supports can be for anything from simple daily activities, transfers, emergencies and much more.

It allows participants to be flexible throughout their day and night without needing to have a roster of care whilst sharing the cost of 24/7 support.

The 24-hour on-site shared support will be provided by one SIL provider. Tenants will help choose this provider by consensus, providing choice and control over their support.

Participants have complete choice and control with their additional support provider they may need for their longer shifts and complex care needs – as well as community access and social support.

What to expect **From OSS**

The on-site care is there to support you throughout your stay, especially in times where support is unplanned. You can call the carer at any time, and they will respond as soon as possible (depending on the support needed) Of course, in the event of an emergency, you will be prioritised.

How is this funded

from my NDIS plan?

The contribution can be funded through two different options.

We recommend speaking to your planning about applying for the OSS support line item – this will be claimed directly from the onsite provider weekly and can only be used for this specific model.

Alternatively, your core funding can be claimed weekly for the same amount.
